All Wood / All Different

After years of testing by team riders and staff, X-Band deck construction is now available to the public. Utilizing the natural strength of wood grain, X-Band decks feature cross plys with the grain running at opposing 45 degree angles. The strength obtained from the unconventional grain configuration allows us to make the deck thinner and lighter than a standard 7-Ply deck while increasing the rigidity and pop.

X-Band deck construction is available in the new Shaman Series.

Jon McGrath

Lipslide Michael O'Meally

The Alien Workshop's newest pro Omar Salazar, joined the Sect this past spring with absolute reckless abandon. His energy and blatant enthusiasm for skateboarding and AWS is undeniable.

He recently relayed an account of his first skateboard purchase some 10 years ago at a shop in Roseville, CA. The knowledgeable clerk quickly recommended a Santa Cruz board but the young Omar already knew better and pointed to an AWS Believe model. He purchased the deck and now a re-issue of that very deck is his latest pro model by the Workshop. Available in original color ways and two sizes.

See page 6 for size specs.
